

## USB driver for PowerMate and CMS Release Notes

This USB driver (2.9.95.2) is fixing compatibility issues with Windows 10.

Before you start we recommend to uninstall all older USB driver version on your computer.

For installation click the .exe file and follow the instructions on the screen.

*Note: driver can be installed without connecting the hardware during installation*

## Technical Support Information

Found a bug? Please contact our tech support team. They can help you resolve issues and will also log bugs.

For your regional tech support contact please go to [www.dynacord.com](http://www.dynacord.com) , use the “Contact” tab in the navigation menu and select your country.
