

Digital Audio Matrix Manager

Controllers

Network interface-module for digital signal-processing matrix

- 1 primary network port, led out through RJ-45 socket
- 1 secondary network port, led out through RJ-45 socket to redundant connection to second network
- Input capacity up to 32 audio channels from network bus per port
- Output capacity to 32 audio channels from network bus per port
- 4 intern serial audio inputs for transmission of 32 audio channels with 24 Bit and 48 kHz sample rate
- 4 intern serial audio outputs for transmission of 32 audio channels with 24 Bit and 48 kHz sample rate
- SNMP and TFTP support for control mode, remote surveillance, configuration and firmware-update via Ethernet-network
- LED status displays per network port

Technical data, hardware:

Ethernet connections	2 x RJ-45 socket accord. to IEEE 802.3U standard
Sample rate	48 kHz
Possible data formats	16 / 20 / 24 Bit
Network technology	CobraNet™
Dimensions (w x h x d)	(89 x 27 x 92) mm
weight	75 g

Product / Brand : Dynacord or equivalent
Type: CM-1
Deliver and mount ready-for-use

Offered brand:
Type:
