

Professional Amplifier Network Digital Card

- Remote Control Module for Supervision and amplifier remote control functions.
- Amplifier integration up to 100 Amplifiers
- 2 Freely programmable input control ports
- 2 Freely programmable output control ports
- 2 reference outputs (+5V)
- Remote line monitoring (Load Referencing)
- Remote switch power on / off functions
- Rear power on delay sequence / Digital or mechanical
- Rear mounted volume controls
- Rear mounted dip setting for load address
- Remote Level controls
- Priority software using IRISNET
- Supervision of : Amplifier temperature / amplifier output voltage / amplifier impedance connected / amplifier current / amplifier status / pilot tone detection.

Technical data, hardware:

Can Bus connections	2 x RJ-45 sockets 10-500K Baud Rate
GPIO Control Port	2 x Control Inputs / 2 x Control outputs / 2 x Reference outputs
Power Consumption	4W
Dimensions (w x h x d)	(103 x 37 x 103) mm
weight	115 g

Product / Brand : Dynacord or equivalent
 Type: RCM 810
 Deliver and mount ready-for-use

Offered brand:
 Type:
