

# IX15:4 4-channel DSP power amplifier, 1.5kW

**DYNACORD**

- 4-channel networked DSP amplifier with 1.5 kW powerTANK for Hi-Z and Lo-Z operation
- 8 x 8 Dante with OCA/AES70 remote control, 4 mic/line inputs usable as Dante break-in
- 96 kHz fully featured DSP matrix mixer and MXE-style TaskEngine for system logic, automation, scheduling and integration
- ghostPOWER via PoE to maintain DSP, Dante network and mic/line inputs
- High efficiency ecoRAIL technology for lower operating costs

The IX15:4 is a 4-channel networked DSP amplifier with 1.5 kW total output power. Able to drive Hi-Z or Lo-Z loads with powerTANK technology, the IX15:4 is ideal for a wide range of applications including sports venues, houses of worship, live performance spaces and hospitality.

IX15:4 features eight (8) Dante inputs, eight (8) Dante outputs and four (4) mic/line inputs, that can be used as Dante break-in points. The natively operating 96 kHz DSP features a full equipped 12 x 12 matrix mixer, EQs, dynamics, Dynacord FX and FIR-Drive capability. All 12 inputs feature pilot-tone detection, while the eight (8) Dante and four (4) amplifier outputs allow to add pilot tones up to 30 kHz. The IX15:4 uses Dynacord's patented ecoRAIL technology for optimizing energy consumption. ghostPOWER via POE maintains the entire DSP, the Dante network and all mic/line inputs active, independent of the mains power. The integrated MXE-style TaskEngine allows for system automation, scheduling, control, and integration to third party devices.

IX series is fully integrated in Dynacord's SONICUE Sound System Software and can be used as a SONICUE control server, for direct use with the WPN1 wall controller as well as TPC-1, iOS and Windows devices.
